Bellver Card quick guide

Independent guide shared by Mercedes · bellveraffiliates.com/mercedes

What it is

- **A crypto-funded payment card.** Load it with USDT or USDC and pay in shops, online and at ATMs. Physical Visa or virtual Mastercard, with Apple Pay and Google Pay.
- **Your own wallet behind it.** A non-custodial Web3 wallet secured by Fireblocks. You hold the private key, so only you control the money in it.
- **Fund it on BNB Smart Chain or Tron.** Send USDT or USDC (BEP-20 on BNB Smart Chain is the easy choice), plus a little BNB for network fees.

The four cards

one-time price, no monthly fee listed

LEVEL	PRICE	DAILY LIMIT	PER PAYMENT	MONTHLY REWARDS
Basic	**$99**	$1,000	$500	Not included
Premium	**$270**	$10,000	$5,000	Up to 12 levels
Business MOST POPULAR	**$490**	$50,000	$10,000	Up to 15 levels
Gold	**$990**	$250,000	$20,000	Up to 20 levels

Physical and virtual cards cost the same. Upgrade any time and pay only the difference.

Fees in plain numbers

3.9%
Top-up fee, taken from what you load. Load $100 and **$96.10** reaches your card.

1.75%
Per payment. Pay $50 and the fee is about $0.88.

2%
ATM withdrawal (physical card).

$85
Shipping a physical card to Europe. $149 to the rest of the world.

Add-ons: Special Edition +$370 when you buy ($470 to upgrade later), your name printed on the card +$49. The minimum top-up is $10.

Virtual or physical?

Virtual Mastercard

- Issued in minutes, ready to use
- Online, Apple Pay and Google Pay
- No shipping fee, no waiting

Physical Visa

- Tap in shops and use ATMs
- Shipping $85 (Europe) or $149
- Bellver says up to 4 weeks: allow 4 to 6

Smart start: order the virtual card first and start paying today. A physical card makes most sense on Business or Gold, where the shipping cost is small next to the card. For delivery, give a complete address and a mobile number from the delivery country.

Prices and fees: Bellver's official price list (08/2026) with the October 2026 update. Checked 27 Oct 2026. Bellver can change them.

Order your card in 7 steps

1. **Register** with Mercedes's link (below), so Mercedes can see your sign-up and help you.
2. **Secure your account.** Two-factor login, a transaction password, and your private key written down offline.
3. **Fund your wallet.** About $10 of BNB for network fees, then USDT for your card price **plus $10** (the card's opening balance).
4. **Order your card** in My Cards: level, virtual or physical, and any add-ons. Pay from your wallet.
5. **Load it and pay.** Move money from your wallet to your card, then add it to Apple Pay or Google Pay.
6. **Share your link,** only if you want to. It is optional.
7. **Get paid.** Earnings become available on the 15th. The minimum withdrawal is $100.

The rewards plan optional

Direct commissions, one time. For every card ordered through your link, paid in USDT. You do not need a card of your own to earn these.

$10	$100	$200	$400
Basic	Premium (SE $150)	Business (SE $300)	Gold (SE $500)

- **Monthly rewards:** 0.1% of every completed top-up by cardholders in your 2x2 matrix, on the levels you qualify for. Needs your own Premium card or higher.
- **Your first star:** hold a Premium card and directly refer two new people who each buy Premium.
- **The $100 rule:** load at least $100 onto your own card each month to receive that month's rewards. It is your own money to spend, not a fee. Miss three months in a row and the matrix position is lost.

Stay safe

- Never share your private key or passwords. No real support person asks for them.
- Bellver never emails login links. Type app.bellvercards.com yourself.
- Sending crypto? Check the network, and send a small test amount first.

Watch it done

- **6 tutorials:** register, secure, back up your key, fund and order, your dashboard, top up.
- **5 explainers:** where your money sits, which card, the 2x2 matrix, your first week, 10 reasons.
- Free on the guide, and on its Downloads page.
